Pro Plug PVC Tool: Patent Pending

PRO PLUG® System for NuCedar® PVC Pre-Finished Siding & Trim

Integrated Plug Fastening System for PVC Trim & Vertical Siding

Pro Plug® System for PVC is a superior and easy-to-install plug fastening system for PVC Vertical Siding and PVC Trim. The system is available for a broad range of trim materials, with epoxy coated or stainless steel fasteners in a full range of sizes—giving builders the ability to choose the right screw for a wide variety of applications.

The system features the PVC Tool (which drives screws to the correct depth without stripping the screw recess or damaging the deck board surface), star drive fasteners in both epoxy coated carbon steel and stainless steel (Grade 305 and Marine Grade 316), and plugs made from actual siding and trim material. We will pre-finish the plugs to match the Vertical Siding & Trim.

Approved for use with ACQ treated lumber. Follow the siding or trim manufacturer's recommendation when selecting either stainless or epoxy coated screws. For applications exposed to salt air, near large bodies of water, swimming pools or other areas where corrosion is more likely to occur, use Marine Grade 316 Pro Plug System for PVC stainless steel fasteners.

1 Set screw with PVC Tool **2** Tap in plug with hammer

Pro Plug® PVC Tool

Auto-Stop™ Mechanism

Once target depth is reached, the Auto-Stop™ mechanism inside the tool disengages the driver bit and stops the screw from driving further, without stripping the screw recess.

PRO PLUG® PVC TOOL
Patent Pending

Free Spinning Stop Collar
The free spinning stop collar is fitted with a rubber O-ring to prevent damage to the work surface.

Special Bits for Deck and Trim/Vertical

Applications

DECK   TRIM

Driver bits used with the PVC Tool are replaceable. There
are two types of driver bits: *Deck* bits and *Trim* bits, each optimized for their specific application. Both PVC Tool packages and PVC Deck/Trim Kits include bits.

Note: Impact drivers may not set screws to the correct depth. Standard drills are recommended for use with the Pro Plug PVC Tool.
Plugs

Plugs

Plugs are made from actual Siding and trim board material, so the color and grain match perfectly. Plugs are pre-finished to match the siding & trim.

Epoxy Carbon Steel			Stainless Grades 305 & 316

Fasteners

Stainless and Epoxy Coated Star Drive Fasteners:

All fasteners are ACQ approved. When driven below the deck or trim board surface with the PVC Tool, the fasteners create a perfect hole for the matching plug, without pre-drilling.

Packs

Siding: 75 pc (20 sq ft)
Trim: 75 pc (50 lin ft)

Siding: 375 pc (100 sq ft)
Trim: 375 pc (250 lin ft)
+ Free PVC Tool

Siding: 1125 pc (300 sq ft)
Trim: 1125 pc (750 lin ft)
