

## COVID-19 Update

We are happy to announce that our MA plant is now back open for business.

The safety of our employees and customers are our first priority, so we are taking every measure to insure we follow all CDC guidelines. All sales teams are working at home and are on strict no travel mandate. All samples will be delayed for the time being until we can effectively make sure we are doing this safely.

If you have any questions regarding our procedure or about our products, please feel free to contact us at [inquiries@jainamericas.com](mailto:inquiries@jainamericas.com)

## Happy Earth Day

April 22nd celebrates the 50th year of Earth Day!

We, at Jain, strive to achieve what our Mission Statement has always been: Leave this World Better than you Found it. We may not be perfect, and we know we have a long way to go, but we will try every day to be better.

## Testimonials

We spent the day recently (pre-COVID) with Marnie Oursler, of Marnie Custom Homes and star of DIY network Big Beach Builds.

Find out why Marnie uses NuCedar as her siding, not only for her customers, but for her own home.
